A largely attended meeting of the European members of the Police Force was held yesterday at the Central Station, Inspector Hanson presiding, and it was unanimously resolved to send a memorial to the Government asking that their splaries be reckeded at the rate of 3/4 to the dollar, and that the bulf-pay rate while on leave remain as heretofore. The effect of this would be to make the salary of a constable amount to £100 per annum, as it was years ago, but which lately, owing to the fall in exchange, ha been considerably below that sum.

Says a home paper :- "Owing to recent fav oursble reports, the attention of the British p lio, especially of the speculative portion of has been directed to the gold-mining industry of the Colar district of Southern India. The produce of these fields is as nothing compared wit that of South Africa or Austrelia, but it is increasing with marvellous steadiness, and great things are looked for in the future. Only four of the mines are of importance, the Coregim holders the former returns 55 per cent. for last year, and the Mysore dividends for the past five years have been 424, 774, 70, 55, and 65. Smuler mines have paid from 20 to 40 per coct. A striking difference between these and the Afrioun fields lies in the more equal distribution of the gold, the sudden failure of a vein, so common an incident in the Transvaal, being practically

unknown in Colar. Says the Financial News :- Poor milver will soon have no friends left save Mr. Bland and the Hongkong Chamber of Commerce. GREAT FIRE AT SHANGHAI. An ortensive fire, almost unparalleled in the large area. There was a strong gale blowing at ling among Indian races. the time and this caused the fire to rage with such fierceness that the efforts of the natives to cope with it were entirely unavailing, not with standing that innumerable portable fire ongines were brought into requisition. House after house was eaten up and at one time it really looked as if the dames would communicate to the | Id the race for the Lincolnshire Handicap the French Concession. To be prepared for this, the French firemen proceeded to the and of the Concession and waited results: As 2000 as the Chief Engineer of the Fire Brigade was apprised of the proximity of the fire to the Concession; he paid a visit to the locality and baving salist fied himself of the danger, called out the firemen. They responded with elecrity, but did not commence operations, the fire being outside their limits. The Franch Consul-General and members of the French Municipal Council and of the Fire Commission were parly on the scene, and as soon as Taotai Nish, who was at the fire, found that the firemen were walting. he sought the Chief Engineer and personally asked his assistance. This was really to corded, and two streams from the float and three from land engines were soon playing on the burning buildings, with the result that the progress of the fire was stopped, though not subdued. The firemen worked at the end near. est the Concession and concentrated their energies on an extensive wood yard which hurnt fiercely, the flames leaping many feet high to the danger of the intact houses. Such wer the hunting, and killed. intensity of the heat that the firemen. though sheltered behin lanks, had to be relieved every few miontes
